Dobrý den.

Tento týden si zopakujeme látku týkající se každodenní mezilidské komunikace

WHY DON'T WE GO SKATING? LET'S GO SKATING. SHALL WE GO SKATING?

Použijete vždy, když se s kamarády domlouváte, co podniknete.

Také se podíváme po světě a zjistíme, jaké dopravní prostředky používají lidé v různých koutech světa.

ÚKOL 1 – LISTENING - Poslechněte si dva rozhovory a zodpovězte následující otázky:

Travel Around the

RIGHT NOW, NOBODY IS TRAVELLING. PEOPLE EVERYWHERE ARE STAYING AT HOME BECAUSE OF THE **CORONAVIRUS**!. IT'S BORING. BUT HOW DO WE NORMALLY TRAVEL? LET'S ASK SOME KIDS FROM AROUND THE WORLD.

Fenna, Amsterdam

In the Netherlands², many people ride bikes. It's easy because it is very **flat**³ here. I go everywhere on my bike and so do my friends. There are bikes everywhere. In fact, in the Netherlands there are more bikes than people. In Amsterdam there are more than 500 kilometres of **cycle paths**⁴, so you can go anywhere you want by bike. Cycling is great for **the environment**⁵ and it keeps you fit, so it is good for you and good for the planet.

Matteo, Venice

People in Venice go everywhere by gondola. Ha ha! Not really. Gondolas are very special boats that you can only find in Venice, but only tourists **use**⁶ them; they are expensive. Venice is quite small, so most people walk where they need to go. I walk to school every day. It takes me 30 minutes but it is healthy and better for the environment than going by car. There is another kind of boat in Venice that I sometimes take called a *vaporetto*. A *vaporetto* is a water bus. It's like a normal bus, with bus stops where people get on and off, but it goes on water, not on a road.

Kimberley, Los Angeles

Everybody drives in L.A. It's a very big city, so it takes a long time to walk anywhere. But it can take a long time to drive, too. There are a lot of **traffic jams**⁷, because there are so many cars, buses, trucks, motorbikes and taxis on the roads. Because there are so many **vehicles**⁸, the air here is very dirty. There is a lot of **smog**⁹. It's really bad. More and more people have electric cars though – they are greener* than normal cars. I hope in **the future**¹⁰, everyone will have electric cars.
